PK: Packaging Design

PK 211 — Introduction to Packaging Design
1.5 credits; 3 lab hours
An introduction to the field of packaging design, covering branding, graphics, materials, technology, and typography. This studio course focuses on design phases from concept to three-dimensional comprehensives, and includes field trips and guest lecturers.

PK 212 — Foundation in Three-Dimensional Design for Consumer Packaging
2 credits; 1 lecture and 2 lab hours
With a focus on three-dimensional conceptual design, students learn the basics of how packaging design professionals create innovative forms that have visual impact within the retail area. They experiment with a variety of packaging materials, as well as recycled and sustainable solutions.

PK 216 — Foundation in Packaging Design
2 credits; 1 lecture and 2 lab hours
This course introduces the fundamentals of packaging design. Lectures and design assignments provide students with the opportunity to understand and explore packaging design principles as they apply to the marketing of consumer brands.
Co-requisite(s): (for one-year Communication Design Foundation students) AD 216.

PK 301 — Packaging Design for Home Products
2 credits; 1 lecture and 2 lab hours
Students learn about packaging/brand design specific to home products retailing: brand identity, packaging design systems, and brand design applications throughout the retail environment. The creative process of design and strategic analysis of packaging as a marketing and merchandising tool is explored.

PK 302 — Packaging Design for Cosmetics and Fragrance Marketing
2 credits; 1 lecture and 2 lab hours
For Cosmetics and Fragrance Marketing students. This hands-on course introduces the principles of packaging design for cosmetics and fragrance products. Students learn about brand identity, packaging design systems, materials, and the relationship between packaging and cosmetic and fragrance retailing.
Prerequisite(s): CM 341.

PK 303 — Packaging Design for Accessories Design
2 credits; 1 lecture and 2 lab hours
The packaging and brand design of accessory products is introduced. Through design projects, students learn about brand identity, packaging design systems, the variety of packaging materials, and how packaging affects the product at retail. Guest lecturers discuss how designers create brand identities, develop concepts, make design decisions, and oversee production.

PK 315 — Digital Prepress for Packaging Design
2 credits; 1 lecture and 2 lab hours
This course introduces students to digital mechanical art creation specifically for packaging design. Students learn file management, printing methods, color processes, packaging substrates, and how a packaging design moves from design approval to mechanical art creation.

PK 317 — Packaging Design Process
3 credits; 3 lecture hours
This lecture-based course examines the packaging design process as the means by which marketing strategy and the goal of putting the packaged product into the hands of consumers is translated. Emphasis is placed on all aspects of how a clear and effective design process is the essential foundation to meeting the goal of developing packaging designs that are effective sales tools. Co-Requisite(s): PK 318.
PK 318 — Packaging Design Studio I
3 credits; 6 lab hours
The studio environment is central to an education in packaging design. Students explore the
packaging design methodology and discover techniques and approaches that form their individual
design process. They demonstrate knowledge gathered in their fifth semester courses and utilize
the studio method of learning. Co-Requisite(s): PK 317.

PK 319 — Packaging Design Studio II
3 credits; 3 lecture and 3 lab hours
This studio course explores strategic thinking as it applies to brand packaging design across
consumer product categories. Working collaboratively with designers, clients and creative
resources is an essential aspect of the design studio environment. Gathering and evaluating
information, developing strategies, and implementation are all aspects of the design-planning
model applied in this studio.
Corequisite(s): PK 354.

PK 325 — Typography for Brand Packaging
2 credits; 1 lecture and 2 lab hours
This course is designed to explore all aspects of creative typographic design for brand packaging
design. Through assignments, exercises, and lectures, students develop an understanding of how
professional designers develop and apply brand identities. Students explore how typographic
decision-making and design strategies affect the application of typography for brand packaging
design.
Co-requisite(s): PK 317.

PK 341 — Computer Graphics for Packaging Design
2 credits; 1 lecture and 2 lab hours
Through hands-on interaction, students learn technology as a packaging design tool. Students
learn the intricacies of various software tools as they are utilized in packaging design. Students
create a die, utilizing the toolbox, plug-in resources, application of scanned and designed images,
and understanding color output as tools in the development of two- and three-dimensional
packaging designs.

PK 342 — Advanced Computer Graphics for Packaging Design
2 credits; 1 lecture and 2 lab hours
A hands-on studio using an advanced approach to current software programs to master the use
of layers, create composites, customize tools, understand color and contrast adjustment, create
convincing 3D images, apply gradients, adjust effects, and transform art in order to achieve the
best output of packaging design comprehensives.
Prerequisite(s): PK 341
Co-requisite(s): PK 354.

PK 343 — Explorations in 3D for Packaging Design
2 credits; 4 lab hours
This course challenges students to consider the transition of taking two-dimensional design
explorations into a three-dimensional representation. Experimentation with materials, methods and
technology are key components of this studio course.

PK 354 — Packaging Design Strategy
3 credits; 3 lecture hours
Students learn how the formulation and development of ideas takes shape from the foundation
of research, exploration and investigation, and how the formation of a packaging design strategy
can achieve visual problem-solving goals. They learn how a clearly articulated and defined strategy
facilitates the design process and serves the objective of a successful packaging design.
Corequisite(s): PK 319.
PK 361 — Packaging Design: Global Perspectives
3 credits; 3 lecture hours
Students experience the business of branding and packaging design in Europe through on-site lectures, seminars, tours, presentations at design consultancies, manufacturers, marketers, museums, suppliers and retailers. They learn the design process, profession, marketing, and retailing from an international perspective.

PK 403 — Packaging for the Toy Designer
2 credits; 1 lecture and 2 lab hours
Emphasizes conceptual and mechanical toy packaging development, introducing students to types of packaging and constructions used in the toy industry. Environmental and safety issues are considered in addition to study of marketing, trends, and consumer motivation.
Prerequisite(s): all seventh-semester Toy Design courses or approval of chairperson.

PK 413 — Sustainable Packaging Design Development
3 credits; 6 lab hours
In this course, students learn how designers apply best practices in design excellence and innovation to create smart, well-designed and professionally executed packaging design systems. They are assigned roles and work individually and in teams to follow realistic design objectives and experience constraints including project structure, timing and budget.

PK 418 — Packaging Design Studio III
3 credits; 6 lab hours
In this course, students learn how designers apply best practices in design excellence and innovation to create smart, well-designed and professionally executed packaging design systems. They are assigned roles and work individually and in teams to follow realistic design objectives and experience constraints including project structure, timing and budget.
Corequisite(s): PK 463.

PK 426 — 3D Concepts for Packaging Design
1.5 credits; 3 lab hours
An advanced approach to composition and structural design skills to create three-dimensional models for packaging design. The course focuses on the issues and problems that arise in the transition between two-dimensional design explorations and three-dimensional representations.

PK 427 — Packaging Design Portfolio Preparation
3 credits; 6 lab hours
This capstone course is designed for students majoring in Packaging Design to successfully prepare, plan, design and consider their own professional goals and objectives. Career options, resume and portfolio preparation and design projects to broaden and enhance the portfolio are covered.

PK 431 — Sustainable Packaging Design
2 credits; 1 lecture and 2 lab hours
Students learn the fundamentals of sustainable design for brand packaging design, including best practices, environmental and social issues, industry terminology, characteristics of sustainable materials, life cycle analysis, the packaging scorecard and the myriad of materials, technologies, guidelines and regulations. The application of this knowledge is applied to create positive change.

PK 432 — Materials, Technologies, and Production in Sustainable Packaging Design
2.5 credits; 2 lecture and 1 lab hours
Students study and assess current and emerging materials from a sustainability perspective, and review the positive and negative properties of plastics, paperboard and other fibers, metal, glass, and hybrids. They analyze consumer perceptions of various materials, and study manufacturing technologies and the evaluation of printing, production, and finishing processes.
PK 463 — Packaging Design for Professional Practice
3 credits; 3 lecture hours
In this course, students gain an understanding of the competitive business processes associated with designing consumer brands. The roles and responsibilities of packaging design professionals in the context of the global consumer product goods (CPG) industry is covered. Students gain an understanding of the business of packaging design from the perspective of industry leaders and practitioners, and are prepared for practice.
Corequisite(s): PK 418.

PK 491 — Internship
3 credits
An unsalaried 14-week internship with a design firm with a minimum of 123 hours at the worksite and 12 hours on campus. Completion of a daily diary, a written report on the experience, and a portfolio of work are required.

PK 499 — Independent Study in Packaging Design
1-3 credit
Prerequisite(s): a minimum 3.5 GPA and approval of instructor, chairperson, and dean for Art and Design.
